INDEX TO SUBJECTS

A

A-cells, of cat islets of Langerhans, ultrastructure of following sympathetic stimulation of glucagon secretion, immunological and EM study, 593

Acinar cells, of developing rat parotid gland, proliferative behavior of, biochemical and light and EM study, 81

Adrenal cortex, of rat, osmium-staining of endoplasmic reticulum and mitochondria in, light and EM study, 252

Albumin, bovine serum, effects of on glucose metabolism and release of nonesterified fatty acids and glycerol by adipose cell isolated from rat epididymal fat pad, biochemical study, 354

Alga *Euglena gracilis*, periodic increase in deoxyribonuclease activity during cell cycle of, biochemical study, 613

— *Ochromonas danica*, effects of light on nuclear and organelle RNA synthesis in, radioautographic EM study, 599

Annulate lamellae, in human melanoma cells, ultrastructure of pore complexes of, EM study, 604

Axonemal microtubules and links, of *Echinosphaerium nucleofilum*, arrangement of, geometrical analysis, 183

Axonemes, from cilia of *Pecten irradians*, enzymatic properties of, biochemical and EM study, 416

Axons, single excitatory and inhibitory, in lobster, metabolism of γ-aminobutyric acid (GABA) in, biochemical study, 290

Axoplasm, synaptic, organization of in central nervous system of lamprey *Petromyzon marinus*, light and EM study, 199

B

Bacterium *Escherichia coli*, respiration and protein synthesis in membrane-envelope fragments of, cytochrome analysis, biochemical and EM study, 114

Basal body replication and ciliogenesis, in suctorian *Tokophrya infusionum*, EM study, 553

Blastulae, of *Arbacia punctulata*, nucleating sites for assembly of cytoplasmic microtubules in ectodermal cells of, EM study, 564

Blood, of human, interaction of monocytes and macrophages with antigen and lymphocytes, biochemical and immunological and radioautographic study, 97

Brain, of rat, substructure of microtubules of nerve cells of, revealed by ruthenium red, EM study, 159

C

Carbohydrates, galactose and glucosamine, addition of to immunoglobulin of mouse myeloma LPC_1, biochemical study, 42

—, galactose and glucosamine, intracellular transport and sites of addition of to immunoglobulin of mouse myeloma LPC_1, biochemical and radioautographic EM study, 52

Carotid body glomus cells, effects of sinus nerve stimulation on, cytochemical EM study, 544

Cartilage matrix, ultrastructure of with lysozyme as vital stain, EM study, 626

Cat, carotid body glomus cells, effects of sinus nerve stimulation on, cytochemical EM study, 544

—, islets of Langerhans, ultrastructure of A-cells of following sympathetic stimulation of glucagon secretion, immunological and EM study, 593

Cell, adipose, isolated from rat epididymal fat pad, effects of bovine serum albumin on glucose metabolism and release of nonesterified fatty acids and glycerol on, biochemical study, 354

—, adipose, isolated from rat epididymal fat pad, pinocytosis in, biochemical and EM study, 342

—, adipose, isolated from rat epididymal fat pad, ultrastructure and metabolism of, biochemical and EM study, 326

— coat material, formation of for whole surface of columnar cells in rat small intestine, radioautographic light and EM study, 409

— cycle, in synchronized *Euglena*, periodic increase in deoxyribonuclease activity during, biochemical study, 613

— division and DNA replication, relationship between in heat-synchronized *Tetrahymena*, radioautographic study, 533

— injury, of frog heart muscle, fine structure and electrophysiology of, physiological and EM study, 455

— organelles, of rat liver, separation of by carrier-free continuous electrophoresis, new method for preparation of lysosomes, biochemical and EM study, 576

Cells, of anaerobically grown *Saccharomyces cerevisiae*, isolation of mitochondrial structures from, biochemical and EM study, 88

—, Chinese hamster, CHO line, regulation of initiation of DNA synthesis in, G_1 arrest in suspension culture, biochemical and radioautographic study, 151

—, columnar, in rat small intestine, formation of cell coat material for whole surface of, radioautographic light and EM study, 409

Cells, differentiating, proliferative behavior of indeveloping rat parotid gland, biochemical and light and EM study, 81
—, ectodermal, of blastulae of *Arbacia punctulata*, nucleating sites for assembly of cytoplasmic microtubules in, EM study, 564
—, glomus, of carotid body, of hamster and cat, effects of sinus nerve stimulation on, cytochemical EM study, 544
—, hamster (BHK-21) and mouse (L-929), comparison of high molecular weight RNA from mitochondria of, biochemical study, 245
—, HeLa, application of assay for soluble sulfhydryl to study of glutathione levels during life cycle of, biochemical study, 165
—, human melanoma, ultrastructure of pore complexes of annulate lamellae, EM study, 604
—, in developing starfish embryo, onset of electrical communication between, physiological study, 187
—, of mouse myeloma LPC_1, immunoglobulin synthesis and secretion in, addition of carbohydrate moieties, biochemical study, 42
—, of mouse myeloma LPC_1, immunoglobulin synthesis and secretion in, sites of addition of carbohydrate moieties and intracellular transport, biochemical and radioautographic EM study, 52
—, nerve, of rat brain, substructure of microtubules of as revealed by ruthenium red, EM study, 159
—, somatic, BSC-1, characterization of by determination of volumes with Coulter counter, statistical study, 610
Chloroplasts, of spinach and *Elodea* leaves, photooxidation of diaminobenzidine (DAB) by lamellae of, cytochemical EM study, 617
Cholesterol biosynthesis inhibitors, retardation of peripheral nerve myelination in mice treated with, quantitative EM study, 505
Chorioid, of stingaree, melanosomes and crystal sacs in same cell of, EM study, 426
Cilia, of *Pecten irradians*, enzymatic properties of axonemes from, biochemical and EM study, 416
Ciliogenesis, and basal body replication, in suctorian *Tokophrya infusionum*, EM study, 553
Colchicine, effects of on spermatogenesis in *Nitella*, light and EM study, 220
Contractile vacuoles, isolated from *Amoeba proteus*, contraction of, phase microscopic study, 431
Coulter counter, characterization of somatic cells by determination of volumes with, statistical study, 610
Cow, oocytes, hooded mitochondria of, light and EM study, 405
Crystal sacs and melanosomes, in same cell in chorioid of stingaree, EM study, 426
Cytochromes, in *Escherichia coli* membrane-envelope fragments, biochemical and EM study, 114
Cytoplasm, of *Amoeba proteus*, role of filaments from in consistency changes and movement, viscosity and light and EM study, 267

D

Deoxycytidine, utilization of for formation of DNA-thymine, in mouse lymphocytes, radioautographic study, 403
Deoxyribonuclease activity, periodic increase in, during cell cycle in synchronized *Euglena*, biochemical study, 613
Desmosomes, in insect *Galleria mellonella*, EM study, 421
Diaminobenzidine (DAB), photooxidation of by chloroplast lamellae, cytochemical EM study, 617
DNA replication and cell division, relationship between in heat-synchronized *Tetrahymena*, radioautographic study, 533
— synthesis, regulation of initiation of, in Chinese hamster cells, G_1 arrest in suspension culture, biochemical and radioautographic study, 151
DNA-thymine, in mouse lymphocytes, utilization of deoxycytidine for formation of, radioautographic study, 403
Duck, anterior hypophysis, in organ culture, synthesis and renewal of proteins in, biochemical study, 130

E

Electrical communication, between cells in developing starfish embryo, physiological study, 187
Electrophoresis, carrier-free continuous, separation of cell organelles of rat liver by, new method for preparation of lysosomes, biochemical and EM study, 576
Embryo, of rabbit, acetylcholinesterase in dorsal root neuroblast of, microgasometric and cytochemical EM study, 64
—, of starfish *Asterias forbesi*, onset of electrical communication between cells in, physiological study, 187
Endoplasmic reticulum and mitochondria, in rat adrenal cortex, osmium-staining of, light and EM study, 252
Endosperm, of castor bean, developmental changes in microbodies (glyoxysomes) and related organelles of, cytochemical light and EM study, 435
Enzyme, acetylcholinesterase, in dorsal root neuroblast of rabbit embryo, microgasometric and cytochemical EM study, 64
—, ATPase, in axonemes from cilia of *Pecten irradians*, biochemical and EM study, 416
—, monoamine oxidase, use of as marker for outer membrane of rat liver mitochondria, biochemical study, 173
Enzymes, of γ-aminobutyric acid (GABA) metabolism, in single excitatory and inhibitory axons, in lobster nervous system, biochemical study, 290
Epithelium, of large intestine, of rat, fine structural localization of peroxidase activity in, cytochemical light and EM study, 168

F

Fat pads, epididymal, of rat, effects of bovine serum albumin on glucose metabolism and release of nonesterified fatty acids and glycerol by adipose cell isolated from, biochemical study, 354
— pads, epididymal, of rat, pinocytosis in adipose cell isolated from, biochemical and EM study, 342
— pads, epididymal, of rat, ultrastructure and metabolism of isolated adipose cell of, biochemical and EM study, 326
Fatty acids and glycerol, effects of bovine serum albumin on release of, in adipose cell isolated from rat epididymal fat pad, biochemical study, 354
Fertilization, in sea urchin *Arbacia punctulata*, effects of nicotine on, light and EM study, 308
Fibers, red, white, and intermediate, of mammalian skeletal muscle, ultrastructure of neuromuscular junctions of, EM study, 27
Fibroin, native silk protein, extraction of from middle silk gland of mature silkworm *Bombyx mori*, ultracentrifugal analyses, 1
Filaments, cytoplasmic, of *Amoeba proteus*, role of in consistency changes and movement, viscosity and light and EM study, 267
Frog *Rana catesbeiana*, fine structure and electrophysiology of heart muscle cell injury, physiological and EM study, 455
— *Rana pipiens*, ovarian follicle, metabolic and ultrastructural changes in response to pituitary stimulation, biochemical and radioautographic and EM study, 491

G

G_1 arrest, in suspension culture of Chinese hamster CHO cells, regulation of initiation of DNA synthesis, biochemical and radioautographic study, 151
GABA (γ-aminobutyric acid), metabolism of in lobster nervous system, enzymes in single excitatory and inhibitory axons, biochemical study, 290
Glucagon secretion, ultrastructure of A-cells of cat islets of Langerhans following sympathetic stimulation of, immunological and EM study, 593
Glucose metabolism, and release of nonesterified fatty acids and glycerol, effects of bovine serum albumin on, in adipose cell isolated from rat epididymal fat pad, biochemical study, 354
Glutamate uptake by stimulated insect nerve muscle preparation, biochemical and radioautographic EM study, 300
Glutathione levels during HeLa cell life cycle, application of assay for soluble sulfhydryl, biochemical study, 165
Glycerol and nonesterified fatty acids, effects of bovine serum albumin on release of, in adipose cell isolated from rat epididymal fat pad, biochemical study, 354
Glyoxysomes (microbodies), and related organelles, of castor bean endosperm, developmental changes in, cytochemical light and EM study, 435
Golgi apparatus, in *Amoeba proteus*, cytochemical staining of, EM study, 620

H

Hamster (BHK-21) and mouse (L-929) cells, comparison of high molecular weight RNA from mitochondria of, biochemical study, 245
—, carotid body glomus cells, effects of sinus nerve stimulation on, cytochemical EM study, 544
—, Chinese, CHO cell line, regulation of initiation of DNA synthesis in, G_1 arrest in suspension culture, biochemical and radioautographic study, 151
HeLa cells, assay for soluble sulfhydryl and use for study of glutathione levels during life cycle of, biochemical study, 165
Hormone, cortisone, effects of on sedimentation properties of rat liver mitochondria, biochemical study, 17
Human, blood monocytes and macrophages, interaction with antigen and lymphocytes, biochemical and immunologic and radioautographic study, 97

I

Immunoglobulin synthesis and secretion, addition of carbohydrate moieties, in mouse myeloma LPC_1, biochemical study, 42
—, synthesis and secretion, sites of addition of carbohydrate moieties and intracellular transport, in mouse myeloma LPC_1, biochemical and radioautographic EM study, 52
Inhibitors of cholesterol biosynthesis, Triparanol and AY-9944, retardation of peripheral nerve myelination in mice treated with, quantitative EM study, 505
Injury, to heart muscle cell, of frog, fine structure and electrophysiology of, physiological and EM study, 455
Insect, cockroach *Gromphadorhina portentosa*, glutamate uptake by nerve muscle preparation of, biochemical and radioautographic EM study, 300
— *Drosophila melanogaster*, characterization of two populations of polyribosomes of, biochemical study, 477
— *Rhodnius prolixus*, effects of vinblastine sulfate on microtubular organization of ovary of, light and EM study, 191
—, wax-moth *Galleria mellonella*, desmosomes in, EM study, 421
Intestine, large, of rat, fine structural localization of peroxidase activity in epithelium of, cytochemical light and EM study, 168
—, small, of rat, formation of cell coat material for whole surface of columnar cells in, radioautographic light and EM study, 409

J

Junctions, neuromuscular, of mammalian red, white, and intermediate skeletal muscle fibers, ultrastructure of, EM study, 27

K

Kidney, of mouse, metabolism of ribosomal precursor RNA in, biochemical study, 362
—, of mouse and rat, intrarenal distribution of

tritiated para-aminohippuric acid, section freeze-dry radioautographic study, 518

L

Lamellae, in chloroplasts of spinach and *Elodea* leaves, photooxidation of diaminobenzidine (DAB) by, cytochemical EM study, 617
Lamprey *Petromyzon marinus*, central nervous system, organization of synaptic axoplasm in, light and EM study, 199
Light, effects of on nuclear and organelle RNA synthesis in *Ochromonas*, radioautographic EM study, 599
Lipid composition of nuclear membranes from mammalian liver, biochemical study, 396
Liver, of pig and rat, isolation of nuclear membranes from, biochemical and EM study, 379
—, of pig and rat, lipid composition of nuclear membranes from, biochemical study, 396
—, of rat, methylation of transfer ribonucleic acid during regeneration of, biochemical study, 370
—, of rat, new method for preparation of lysosomes, separation of cell organelles by carrier-free continuous electrophoresis, biochemical and EM study, 576
—, of rat, sedimentation properties of mitochondria of, effects of cortisone treatment, biochemical study, 17
—, of rat, surface charge of mitochondria and their membranes, biochemical and EM study, 137
—, of rat, use of monoamine oxidase as enzyme marker for outer membrane of mitochondria of, biochemical study, 173
Lobster *Homarus americanus*, nervous system, metabolism of γ-aminobutyric acid (GABA) in, enzymes in single excitatory and inhibitory axons, biochemical study, 290
Lymphocytes, of mouse, utilization of deoxycytidine for formation of DNA-thymine in, radioautographic study, 403
Lysosomes, of rat liver, new method for preparation of, separation of cell organelles by carrier-free continuous electrophoresis, biochemical and EM study, 576
Lysozyme as vital stain, ultrastructure of cartilage matrix with, EM study, 626

M

Melanosomes and crystal sacs, in same cell in chorioid of stingaree, EM study, 426
Membrane-envelope fragments, of *Escherichia coli*, respiration and protein synthesis in, analysis of cytochromes, biochemical and EM study, 114
Membrane, outer, of rat liver mitochondria, use of monoamine oxidase as enzyme marker for, biochemical study, 173
Membranes, nuclear envelope and endoplasmic reticulum, from rat and pig liver, lipid composition of, biochemical study, 396
—, nuclear envelope and endoplasmic reticulum, isolation of from rat and pig liver, biochemical and EM study, 379
—, of rat liver mitochondria, surface charge of, biochemical and EM study, 137
Methylation, of transfer ribonucleic acid, during regeneration of rat liver, biochemical study, 370
Microbodies (glyoxysomes), and related organelles, of castor bean endosperm, developmental changes in, cytochemical light and EM study, 435
Microtubules, cytoplasmic, nucleating sites for assembly of, in ectodermal cells of blastulae of *Arbacia punctulata*, EM study, 564
—, in *Nitella*, effects of colchicine on spermatogenesis, light and EM study, 220
—, in rat brain nerve cells, substructure of, revealed by ruthenium red, EM study, 159
— and links, arrangement of in axonemes of *Echinosphaerium nucleofilum*, geometrical analysis, 183
—, of ovary of *Rhodnius prolixus*, effects of vinblastine sulfate on organization of, light and EM study, 191
Mitochondria and endoplasmic reticulum, in rat adrenal cortex, osmium-staining of, light and EM study, 252
—, hooded, of bovine oocyte, light and EM study, 405
—, of cultured mouse and hamster cells, comparison of high molecular weight RNA from, biochemical study, 245
—, of rat liver, sedimentation properties of, effects of cortisone treatment, biochemical study, 17
—, of rat liver, use of monoamine oxidase as enzyme marker for outer membrane of, biochemical study, 173
— and their membranes, of rat liver, surface charge of, biochemical and EM study, 137
Mitochondrial structures, isolation of from anaerobically grown *Saccharomyces cerevisiae*, biochemical and EM study, 88
Mollusc *Pecten irradians*, enzymatic properties of axonemes from cilia of, biochemical and EM study, 416
Monocytes, and macrophages, of human blood, interaction of with antigen and lymphocytes, biochemical and immunological and radioautographic study, 97
Mouse, kidney, metabolism of ribosomal precursor RNA in, biochemical study, 362
— (L-929) and hamster (BHK-21) cells, comparison of high molecular weight RNA from mitochondria of, biochemical study, 245
—, lymphocytes, utilization of deoxycytidine for formation of DNA-thymine in, radioautographic study, 403
—, and rat, kidney, intrarenal distribution of tritiated para-aminohippuric acid, section freeze-dry radioautographic study, 518
—, sciatic nerve, treated with inhibitors of cholesterol biosynthesis, retardation of peripheral nerve myelination in, quantitative EM study, 505
— tumor, myeloma LPC_1, immunoglobulin synthesis and secretion in, addition of carbohydrate moieties, biochemical study, 42
— tumor, myeloma LPC_1, immunoglobulin synthesis and secretion in, sites of addition of carbohydrate moieties and intracellular transport,

biochemical and radioautographic EM study, 52
Muscle, cardiac, of frog, fine structure and electrophysiology of injury to, physiological and EM study, 455
—, skeletal, of rat, ultrastructure of neuromuscular junctions of red, white, and intermediate fibers of, EM study, 27
—, smooth, effect of on intercellular spaces in toad urinary bladder, phase microscopic study, 235
Myelination, retardation of, in peripheral nerve of mice treated with inhibitors of cholesterol biosynthesis, quantitative EM study, 505

N

Nerve muscle preparation, from cockroach *Gromphadorhina portentosa*, glutamate uptake by, biochemical and radioautographic EM study, 300
—, peripheral, in mice treated with inhibitors of cholesterol biosynthesis, retardation of myelination in, quantitative EM study, 505
—, sinus, effects of stimulation of on carotid body glomus cells, cytochemical EM study, 544
Nervous system, central, of lamprey *Petromyzon marinus*, organization of synaptic axoplasm in, light and EM study, 199
— system, of lobster, metabolism of γ-aminobutyric acid (GABA) in, enzymes in single excitatory and inhibitory axons, biochemical study, 290
Neuroblast, dorsal root, of rabbit embryo, acetylcholinesterase in, microgasometric and cytochemical EM study, 64
Neuromuscular junctions, of mammalian red, white, and intermediate skeletal muscle fibers, ultrastructure of, EM study, 27
Nicotine, effects of on fertilization in sea urchin *Arbacia punctulata*, light and EM study, 308
Nucleating sites, for assembly of cytoplasmic microtubules in ectodermal cells of blastulae of *Arbacia punctulata*, EM study, 564
Nucleus, of rat and pig liver, isolation of membranes from, biochemical and EM study, 379
—, of rat and pig liver, lipid composition of membranes from, biochemical study, 396
—, and organelles, of *Ochromonas*, effects of light on RNA synthesis in, radioautographic EM study, 599

O

Oocytes, of cow, hooded mitochondria of, light and EM study, 405
Organ culture, of duck anterior hypophysis, synthesis and renewal of proteins in, biochemical study, 130
Organelles, and nucleus, of *Ochromonas*, effects of light on RNA synthesis in, radioautographic EM study, 599
Osmium-staining, of endoplasmic reticulum and mitochondria in rat adrenal cortex, light and EM study, 252
Osmolality and pH, influence of on fixation of fowlpox virus core, EM study, 179
Ovarian follicle, of frog, metabolic and ultrastructural changes in response to pituitary stimulation, biochemical and radioautographic and EM study, 491
Ovary, of *Rhodnius prolixus*, effects of vinblastine sulfate on microtubular organization of, light and EM study, 191

P

Pancreas, islets of Langerhans, of cat, ultrastructure of A-cells of following sympathetic stimulation of glucagon secretion, immunological and EM study, 593
Para-aminohippuric acid, tritiated, intrarenal distribution of, section freeze-dry radioautographic study, 518
Parotid gland, of rat, proliferative behavior of differentiating cells in, biochemical and light and EM study, 81
Peroxidase activity, fine structural localization of in epithelium of rat large intestine, cytochemical light and EM study, 168
pH and osmolality, influence of on fixation of fowlpox virus core, EM study, 179
Photooxidation, of diaminobenzidine (DAB) by chloroplast lamellae, cytochemical EM study, 617
Pig, and rat, liver, isolation of nuclear membranes from, biochemical and EM study, 379
—, and rat, liver, lipid composition of nuclear membranes from, biochemical study, 396
Pinocytosis, in adipose cell isolated from rat epididymal fat pad, biochemical and EM study, 342
Pituitary, anterior, of duck, synthesis and renewal of proteins of, in organ culture, biochemical study, 130
— stimulation, metabolic and ultrastructural changes in frog ovarian follicle in response to, biochemical and radioautographic and EM study, 491
Plant, castor bean *Ricinus communis*, developmental changes in microbodies (glyoxysomes) and related organelles in endosperm of, cytochemical light and EM study, 435
—, *Nitella missouriensis* and *Nitella mirabilis*, effects of colchicine on spermatogenesis in, light and EM study, 220
—, spinach and *Elodea* leaves, photooxidation of diaminobenzidine (DAB) by chloroplast lamellae of, cytochemical EM study, 617
Polyribosomes, characterization of two populations of, in *Drosophila melanogaster*, biochemical study, 477
Pore complexes, of annulate lamellae, in human melanoma cells, EM study, 604
Protein synthesis and respiration, in *Escherichia coli* membrane-envelope fragments, analysis of cytochromes, biochemical and EM study, 114
Proteins, of native silk, extraction of from middle silk gland of mature silkworm *Bombyx mori*, ultracentrifugal analyses. 1
—, synthesis and renewal of, in duck anterior hypophysis in organ culture, biochemical study, 130

Protozoan *Amoeba proteus*, contraction of isolated contractile vacuoles from, phase microscopic study, 431
— *Amoeba proteus*, cytochemical staining of Golgi apparatus in, EM study, 620
— *Amoeba proteus*, role of cytoplasmic filaments in consistency changes and movement, viscosity and light and EM study, 267
—, dinoflagellate *Gyrodinium cohnii*, ribosomal RNA of, biochemical and EM study, 106
— *Echinosphaerium nucleofilum*, arrangement of axonemal microtubules and links of, geometrical analysis, 183
—, slime mold ameba, *Dictyostelium purpureum*, ribosomal subunit exchange in, biochemical study, 428
—, suctorian *Tokophrya infusionum*, basal body replication and ciliogenesis in, EM study, 553
— *Tetrahymena pyriformis*, heat-synchronized, relationship between DNA replication and cell division, radioautographic study, 533

R

Rabbit embryo, acetylcholinesterase in dorsal root neuroblast of, microgasometric and cytochemical EM study, 64
Radioactive label, amino acids-^{14}C and uridine-^{3}H, ribosomal subunit exchange in *Dictyostelium purpureum*, biochemical study, 428
— label, fucose-^{3}H, formation of cell coat material for whole surface of columnar cells in rat small intestine, radioautographic light and EM study, 409
— label, glucose-^{14}C, effects of bovine serum albumin on glucose metabolism and release of nonesterified fatty acids and glycerol by adipose cell isolated from rat epididymal fat pad, biochemical study, 354
— label, glucose-^{14}C, ^{198}gold, and serum albumin-^{131}I, pinocytosis in adipose cell isolated from rat epididymal fat pad, biochemical and EM study, 342
— label, glucose-^{14}C, ultrastructure and metabolism of adipose cell isolated from rat epididymal fat pad, biochemical and EM study, 326
— label, glutamate-^{14}C, metabolism of γ-aminobutyric acid (GABA) in lobster nervous system, enzymes in single excitatory and inhibitory axons, biochemical study, 290
— label, glutamic acid-^{3}H and leucine-^{3}H, glutamate uptake by stimulated insect nerve muscle preparation, biochemical and radioautographic EM study, 300
— label, leucine-^{14}C, sedimentation properties of rat liver mitochondria, effects of cortisone treatment, biochemical study, 17
— label, leucine-^{3}H, galactose-^{3}H, and glucosamine-^{3}H, immunoglobulin synthesis and secretion, addition of carbohydrate moieties, in mouse myeloma LPC_1, biochemical study, 42
— label, leucine-^{3}H, galactose-^{3}H, and glucosamine-^{3}H, immunoglobulin synthesis and secretion, sites of addition of carbohydrate moieties and intracellular transport, biochemical and radioautographic EM study, 52
Radioactive label, leucine-^{3}H, synthesis and renewal of proteins in duck anterior hypophysis in organ culture, biochemical study, 130
— label, leucine-^{3}H, thymidine-methyl-^{3}H, and uridine-^{3}H, regulation of initiation of DNA synthesis in Chinese hamster cells, G_1 arrest in suspension culture, biochemical and radioautographic study, 151
— label, leucine-^{3}H and uridine-^{3}H, characterization of two populations of polyribosomes in *Drosophila melanogaster*, biochemical study, 477
— label, methyl methionine-^{3}H and uridine-^{3}H, metabolism of ribosomal precursor RNA in mouse kidney, biochemical study, 362
— label, *N*-ethyl maleimide-^{14}C, cystine-^{3}H, and leucine-^{3}H, application of assay for soluble sulfhydryl to study of glutathione levels during HeLa cell life cycle, biochemical study, 165
— label, orotic acid-^{3}H, effects of light on nuclear and organelle RNA synthesis in *Ochromonas*, radioautographic EM study, 599
— label, orotic acid-^{14}C and methyl methionine-^{3}H, methylation of transfer ribonucleic acid during regeneration of liver, in rat, biochemical study, 370
— label, para-aminohippuric acid-^{3}H, intrarenal distribution of para-aminohippuric acid, section freeze-dry radioautographic study, 477
— label, ^{32}-phosphate and adenine-^{3}H, nature and processing of ribosomal RNA in dinoflagellate *Gyrodinium cohnii*, biochemical and EM study, 106
— label, thymidine-^{3}H and deoxycytidine-^{3}H, utilization of deoxycytidine for formation of DNA-thymine, in mouse lymphocytes, radioautographic study, 403
— label, thymidine-^{3}H and DNA-^{3}H, periodic increase in deoxyribonuclease activity during cell cycle in synchronized *Euglena*, biochemical study, 613
— label, thymidine-^{3}H and ^{125}iodine, human monocytes and macrophages, interaction with antigen and lymphocytes, biochemical and immunological and radioautographic study, 97
— label, thymidine-^{3}H, relationship between DNA replication and cell division in heat-synchronized *Tetrahymena*, radioautographic study, 533
— label, tyramine-^{14}C and serotonin-^{14}C, use of monoamine oxidase as enzyme marker for outer membrane of rat liver mitochondria, biochemical study, 173
— label, uridine-^{3}H, leucine-^{3}H, and lysine-^{14}C, metabolic and ultrastructural changes in frog ovarian follicle in response to pituitary stimulation, biochemical and radioautographic and EM study, 491
— label, uridine-^{14}C and ^{32}phosphate, comparison of high molecular weight RNA from mitochondria of cultured mouse and hamster cells, biochemical study, 245
Rat, adrenal cortex, osmium-staining of endoplasmic reticulum and mitochondria in, light and EM study, 252

Rat, brain, substructure of microtubules of nerve cells of, revealed by ruthenium red, EM study, 159
—, epididymal fat pads, effects of bovine serum albumin on glucose metabolism and release of nonesterified fatty acids and glycerol by adipose cell isolated from, biochemical study, 354
—, epididymal fat pads, pinocytosis in adipose cell isolated from, biochemical and EM study, 342
—, epididymal fat pads, ultrastructure and metabolism of isolated adipose cell of, biochemical and EM study, 326
—, large intestine, fine structural localization of peroxidase activity in epithelium of, cytochemical light and EM study, 168
—, liver, methylation of transfer ribonucleic acid during regeneration of, biochemical study, 370
—, liver, new method for preparation of lysosomes, separation of cell organelles by carrier-free continuous electrophoresis, biochemical and EM study, 576
—, liver, sedimentation properties of mitochondria of, effects of cortisone treatment, biochemical study, 17
—, liver, surface charge of mitochondria and their membranes, biochemical and EM study, 137
—, liver, use of monoamine oxidase as enzyme marker for outer membrane of mitochondria of, biochemical study, 173
—, and mouse, kidney, intrarenal distribution of tritiated para-aminohippuric acid, section freeze-dry radioautographic study, 518
—, parotid gland, proliferative behavior of differentiating cells in, biochemical and light and EM study, 81
—, and pig, liver, isolation of nuclear membranes from, biochemical and EM study, 379
—, and pig, liver, lipid composition of nuclear membranes from, biochemical study, 396
—, skeletal muscle, ultrastructure of neuromuscular junctions of red, white, and intermediate fibers of, EM study, 27
—, small intestine, formation of cell coat material for whole surface of columnar cells in, radioautographic light and EM study, 409
Replication, of basal body, and ciliogenesis, in suctorian *Tokophrya infusionum*, EM study, 553
Respiration and protein synthesis in *Escherichia coli* membrane-envelope fragments, analysis of cytochromes, biochemical and EM study, 114
Ribonucleic acid, transfer, methylation of during regeneration of rat liver, biochemical study, 370
Ribosomes, of dinoflagellate *Gyrodinium cohnii*, nature and processing of RNA in, biochemical and EM study, 106
—, of mouse kidney, metabolism of precursor RNA in, biochemical study, 362
—, of slime mold *Dictyostelium purpureum*, subunit exchange in, biochemical study, 428
RNA, high molecular weight, from mitochondria of cultured mouse and hamster cells, biochemical study, 245
—, precursor, from ribosomes of mouse kidney, metabolism of, biochemical study, 362
RNA, ribosomal, in dinoflagellate *Gyrodinium cohnii*, biochemical and EM study, 106
— synthesis, in nucleus and organelles of *Ochromonas*, effects of light on, radioautographic EM study, 599
Ruthenium red, use of for substructure of microtubules in rat brain nerve cells, EM study, 159

S

Sea urchin *Arbacia punctulata*, effects of nicotine on fertilization in, light and EM study, 308
— *Arbacia punctulata*, nucleating sites for assembly of cytoplasmic microtubules in ectodermal cells of blastulae of, EM study, 564
Sedimentation properties of rat liver mitochondria, effects of cortisone treatment, biochemical study, 17
Silk gland, middle, of mature silkworm *Bombyx mori*, extraction of native silk proteins (fibroin) from, ultracentrifugal analyses, 1
Silkworm *Bombyx mori*, middle silk gland, extraction of native silk proteins (fibroin) from, ultracentrifugal analyses, 1
Spaces, intercellular, in toad urinary bladder, effect of smooth muscle on, phase microscopic study, 235
Spermatogenesis, in *Nitella*, effects of colchicine on, light and EM study, 220
Stain, vital, ultrastructure of cartilage matrix with lysozyme as, EM study, 626
Starfish *Asterias forbesi*, onset of electrical communication between cells in developing embryo of, physiological study, 187
Stingaree *Dasyatis sabina*, melanosomes and crystal sacs in same cell in chorioid of, EM study, 426
Sulfhydryl, soluble, ultrasensitive assay for application to study of glutathione levels during HeLa cell life cycle, biochemical study, 165
Surface charge, of membranes of rat liver mitochondria, biochemical and EM study, 137
Synaptic axoplasm, organization of in central nervous system of lamprey *Petromyzon marinus*, light and EM study, 199

T

Toad *Bufo marinus*, urinary bladder, effect of smooth muscle on intercellular spaces in, phase microscopic study, 235

U

Urinary bladder, of toad, effect of smooth muscle on intercellular spaces in, phase microscopic study, 235

V

Vacuoles, contractile, isolated from *Amoeba proteus*, contraction of, phase microscopic study, 431
Vinblastine sulfate, effects of on microtubular organization of ovary of *Rhodnius prolixus*, light and EM study, 191

Virus, fowlpox, influence of pH and osmolality on fixation of core of, EM study, 179
Volumes, determination of with Coulter counter, characterization of somatic cells by, statistical study, 610

Y

Yeast *Saccharomyces cerevisiae*, anaerobically grown, isolation of mitochondrial structures from, biochemical and EM study, 88
